

## MARINE CARTOGRAPHY COMPATIBILITY

Featuring integrated coastal content, the newest generation of Garmin Navionics+™ and premium Navionics Vision+™ cartography offers superior coverage, clarity and detail on your compatible Garmin chartplotter. If your current chartplotter or marine handheld is not compatible with the Garmin Navionics+ format, you can still enjoy our previous generation of BlueChart® g3 coastal charts and inland maps – until you're ready for a chartplotter upgrade.
